Cable Address: "Maydole, Norwichny." Western Union Code

Copyrighted, 1919, by The David Maydole Hammer Co.

INTRODUCTION

Nearly a century ago (in 1831) the first Adz Eye Hammer was designed and made by David Maydole, then a young blacksmith. A little later he established his factory on the site where the largely extended works now stand—the largest in the world manufacturing Handled Hammers only.

It was the purpose of the inventor and founder to make the best Hammers possible. Following his precepts, and being determined that his successful efforts should not be lost, our aim has been and is to continually improve our product regardless of the effort or expense involved.

We, as Americans, are proud of our forefathers. It is a sacred inheritance—a priceless possession. With this in mind we shall continue to manufacture the highest quality Hammers offered to the trade. Every Hammer bearing our imprint—"D. MAYDOLE CAST STEEL"—is warranted to be first-class in every respect. Any which may prove defective in proper usage, will, if returned to us, be replaced.

Experienced judges, after carefully analyzing every point which tends to make a Hammer efficient, awarded the highest honors to the Maydole at every exposition where exhibited, including the International Exhibition at Philadelphia in 1876; the World's Columbian Exposition at Chicago in 1893, and the Pan-American Exposition at Buffalo in 1901; evidencing the fact that the Maydole is the standard of excellence in Hammers.

The universal demand for Maydole Hammers is a constant incentive to us to perpetuate this record of highest quality.

In conclusion we take the opportunity to express our thanks and appreciation of the many favors received from our friends in the trade.

THE DAVID MAYDOLE HAMMER COMPANY

December, 1919.

PAN-AMERICAN EXPOSITION

BUFFALO NEW YORK A.D. 1901

The Directors, on the
recommendation of the Superior Jury,
confer their award of

A SILVER MEDAL
